# iCeMS Seminar

Feb 15, 2019

3 pm–4:30 pm

Kyoto University KUIAS/iCeMS Main Building  
2F Seminar Room

Prof **Makoto Ogawa**

Vidyasirimedhi Institute of Science and Technology (VISTEC)

## Precise Nanostructural Design of Titania

Due to such useful functions of titania, the preparation and characterization of titania with varied phases, macroscopic and nanoscopic organization have been reported. In the present seminar, the preparation of well-defined spherical particles and coating on powders from titanium alkoxides by the controlled polymerization, and the titania nanoparticles using mesoporous silicas as templates will be introduced.
