
The 44th iCeMS SEMINAR

2010 1. 26 (火)
9:00-10:00

講演者： **Prof. Sir Ian Wilmut**

Director

Prof. Charles French-Constant

Deputy Director

Dr. Gordon McLean

Chief Operating Officer

MRC Centre for Regenerative Medicine

英国 エジンバラ大学

演 題： **Frontiers of Regenerative Medicine:
Basic Research to Industrialisation**

再生医療最前線：基礎研究から産業化まで

場 所：京都大学 アイセムス本館 2 階 (東一条北西角)
セミナー室 (A207)

Stem cells offer important opportunities for the development of new therapies, either by transplantation of stem cells or their derivatives, or administration of drugs identified through research with stem cells. The realisation of this immense potential crucially requires research to understand the fundamental biology of stem cells, the development of reliable methods for the derivation, maintenance and differentiation of human stem cells from embryos and tissues, and establishment of key enabling protocols and technologies. The Centre for Regenerative Medicine, at the University of Edinburgh, is well positioned to achieve these goals.

主 催： 京都大学 物質-細胞統合システム拠点 (iCeMS =アイセムス)
