
The 45th iCeMS SEMINAR

**Wed 3 Feb 2010
17:00-18:00**

**The Combustion-Free Civilization:
Perspectives on
Technological and Social Innovations**

Lecturer: **Prof. Yoshihisa Murasawa**
Project Professor
Integrated Research System for Sustainability Science (IR3S)
Tokyo University

Venue: 2nd floor Seminar Room (#A207)
Main Building iCeMS Complex 1, Kyoto University

The Japanese Government has announced that Japan will aim at reducing greenhouse gas emissions by 25% by the year 2025. To achieve this goal, it is essential to realize an electricity-based society, the first step of which is to convert vehicles to electric cars. Promoting solar and wind power generation will eliminate carbon dioxide emissions from cars altogether, and bring society closer to the Combustion-Free Civilization. This seminar aims to provide a landscape of environmental technology development and give a tutorial for technological and social innovations.
