
The 80th iCeMS SEMINAR

2011 5.23 (月)

16:00-17:30

演 題 : **Back to Nature: Eternal Fountain of
New Active Leads**

講演者 : Hany A. El-Shemy 教授

Biochemistry Department, Faculty of Agriculture
エジプト Cairo University

場 所 : 京都大学 アイセムス本館 2階 (東一条北西角)
セミナー室 (A207)

Plants are used medicinally in different countries and are considered the source of many potent and robust drugs. Natural products are eternal source of new potentially active compounds for the treatments of different disorders. Far East, Middle East Sahara, and tropical regions are considered of the richest fountains of natural products in the world. Currently, isolation and purification of the active fraction or active ingredient amongst potentially active natural product is getting great scientific and industrial interests. New compounds for the treatment of malignancies might be de novo identified in terms of structure and function (investigational new drug, IND). Also there might be several well known compounds that recently showed promising activity against cancer (investigational new action drugs, INA).

主 催 : 京都大学 物質-細胞統合システム拠点 (iCeMS =アイセムス)

共 催 : 京都大学医学研究科グローバルCOEプログラム「生命原理の解明を基とする医学研究教育拠点」
