

213th

iCeMS Seminar

June 29, 2018

4 pm–5:30 pm

Kyoto University KUIAS/iCeMS Main Building
2F Seminar Room

Prof **Pimchai Chaiyen**

School of Biomolecular Science and Engineering
Vidyasirimedhi Institute of Science and Technology (VISTEC)

From Fundamental Enzyme Catalysis to Applications in Detection and Green Chemistry

Our research interests span enzyme catalysis, enzyme engineering, systems biocatalysis, metabolic engineering and synthetic biology. We cover the entire spectrum from fundamental research applications to industrial uses and innovations. In this talk, I will highlight our recent work on enzymatic cascades that lead to applications in novel gene reporter technology and biocatalysis.
