# LEARNING LOUNGE

February 23, 2017 2pm

Kyoto University iCeMS  
Main Building 2F Seminar Room

Right at the "Kyodai Seimon-Mae" city bus stop  
on the northwest corner of the Higashi-Ichijo intersection

No registration required  
(iCeMS members register via lab)

Language  
Presentations: English  
Q&A: English and Japanese

## Why Our Science Matters

The "Learning Lounge" features young scientists who, in 20 minutes deliver a presentation that will persuade any curious listener, even those without a scientific background, why their research area—not just the personal research of the speaker—is important to the world.

### Peeking into the Cell with a Chemical Tool

What would you do to catch an elusive fish from the sea? You would probably put out some bait and wait patiently. But how would you catch something from a cell? Here, I'll show you how we succeeded to catch RNA from cancer cells using a chemical biology approach.

### Hand-Delivering Science to You

3-D graphics help us understand complicated science better, but still, non-scientists like me find it hard to access. What if we change the graphics to hand-drawn charming pictures? People would feel much more familiar to the matter. I believe the feelings of "familiarity" that hand-drawn pictures give can change how science looks to the world.
