on the northwest corner of the Higashi-Ichijo intersection

Language

Presentations: English

Q&A: English and Japanese

Register via our website:

u.kyoto-u.jp/ll14

(iCeMS members register via lab)

The "iCeMS Caravan" visits high schools and provides an active-learning program for the students to experience the process of "using knowledge to create and communicate ideas." This time, the Caravan students visit iCeMS in return to deliver their messages!

Students from Aizu Gakuho High School

Scientists, Show Yourself!

We know the word 'scientist', but does anybody know what a scientist actually does? We believe that through greater interaction with society, scientists can empower young people. We therefore ask you to hear our request: "tell us what you are doing!"

What High School Principals Can Do for the Next Generations

The iCeMS Caravan "Mechanism for Learning" held at Aizu-Gakuho this March inspired both the students and us teachers. "What is the key to fostering the next generations?" Keeping this in mind, principals always need to consider the key elements for developing students' abilities. I'd like to share and discuss our approach to "our future".

...And more from an iCeMS Scientist!
