

The Second iCeMS SEMINAR

Brighter and smaller: the indefinite quest for better single molecule probes

Daniel Choquet

Professor
CNRS UMR 5091
Université de Bordeaux

Integration of mechanical and chemical signals in epithelial cell migration

Gaudenz Danuser, Ph.D.

Professor
Laboratory for Computational Cell Biology
Department of Cell Biology
The Scripps Research Institute

Date & Time: December 19, 2007, 10:00-12:15

Venue: Roof Terrace

Institute for Frontier Medical Sciences, 5F of the East Building

In this seminar, we will have two distinguished guest speakers, who are making impressive discoveries in neuronal and cell sciences, by advancing imaging technologies. Please come to their seminars, and meet them. Refreshments will be served.

Contact: Aki Kusumi (Rm 311, East Bldg. of the Institute for Frontier Medical Sciences)
akusumi@frontier.kyoto-u.ac.jp / Phone: 751-4112 / Fax: 751-4113

Held by iCeMS (Institute for Integrated Cell-Material Sciences), Kyoto University
The Institute for Frontier Medical Sciences, Kyoto University / Membrane Mechanisms Project, ICOPR-JST
