# The 57th iCeMS SEMINAR

---

---

2010 9. 09 (木)  
16:00-17:00

演 題: **Multimodality Imaging of  
Angiogenesis**

講演者: **Dr. Xiaoyuan (Shawn) Chen**

Senior Investigator

Chief, Laboratory of Molecular Imaging and Nanomedicine (LOMIN)

米国 National Institute of Biomedical Imaging and Bioengineering (NIBIB)

場 所: 京都大学 アイセムス本館 2階 (東一条北西角)  
セミナー室 (A207)

Angiogenesis, the formation of new blood vessels from the preexisting blood vessels, a key event in tumor progression and many other pathological disfunctions. This talk will summarize some of the recent advances in vasculature imaging at anatomical, functional and molecular level. The use of molecular imaging techniques to monitor anti-angiogenic treatment will also be presented.

主 催: 京都大学 物質-細胞統合システム拠点 (iCeMS =アイセムス)

連絡先: iCeMS 上野 隆史 准教授 e-mail: kitagawa-g@icems.kyoto-u.ac.jp
