

11th iCeMS International Symposium Chemical Control of Cells

Date: Tue, 6 Dec 2011
9:30 am–6:10 pm

Venue: Shiran Kaikan, Kyoto University

Registration: Not required, free of charge

Prospective Poster Presenters: Please contact the Uesugi Lab at
sympo11@icems.kyoto-u.ac.jp

Invited Speakers

Gary Smith (University of Michigan)
Integration of Bioengineering to Improve Embryo and Stem Cell Culture

Hsian-Rong Tseng (University of California, Los Angeles)
“Nano-Velcro” Embedded Devices for Detection of Circulating Tumor Cells in Whole Blood:
A Validation Study in Prostate Cancer Clinic

James Chen (Stanford University School of Medicine)
Spatiotemporal Resolution of the Embryonic Transcriptome Using Caged Molecules

Jean Chmielewski (Purdue University)
Designed Collagen Materials for Regenerative Medicine

Ben Davis (University of Oxford)
Sugars and Proteins

Shoen Kume (Kumamoto University)
Can We Turn ES Cells into Pancreatic Beta Cells?

Norio Nakatsuji (Kyoto University)
Chemical Control of Human Pluripotent Stem Cell Differentiation and Creation of
Neurodegenerative Disease Model Cells

Hiroshi Sugiyama (Kyoto University)
Synthesis and Screening of Pyrrole-Imidazole Polyamides for Epigenetic Activation of
Pluripotent Factors

Motonari Uesugi (Kyoto University)
Small Molecule Tools for Cell Biology and Cell Therapy

Access To The Venue

Overseas Affairs and Planning
Institute for Integrated Cell-Material Sciences (iCeMS)
Kyoto University
